BÜSINESS BÜREAU
Hyderabad

The American Society of Safety Engineers (ASSE) will engage the Telangana and Andhra Pradesh governments in creating protocols across various sectors. The Ministers of Transport of both Telugu speaking states, will be part of the 2017 HSE (Health, Safety and Environment) India Professional Development Conference and Exposition to be held in the city on February 16 and 17.

More than 200 HSE Professionals from around the world will gather at the conference to discuss and mutually learn on environmental, health and safety and sustainability issues relevant to the local context. This Conference is being organised by the American Society of Safety Engineers (ASSE) in collaboration with National Safety Council (NSC) of India.

The conference will have discussion on issues relevant to the local context like road safety and also the upcoming themes like sustainability and life cycle assessment. This will provide a great platform for local professionals to interact with professionals from 9 countries and 12 states of India. The conference would also have technical discussions on subjects like industrial hygiene and occupational health, risk management, process safety and business transformation.

The two-day conference would be preceded by one-day workshops on Feb 15 on Sustainability and two post conference Workshops on Feb 18 on Certified Safety Professional (CSP) Certification and Risk Assessment.

Transport of both Telugu speaking states, will be part of the 2017 HSE (Health, Safety and Environment) India Professional Development Conference and Exposition to be held in the city on February 16 and 17.

Hyderabad: The American Society of Safety Engineers (ASSE) will engage the Telangana and Andhra Pradesh governments in creating protocols across various sectors. The Ministers of Transport of both Telugu speaking states, will be part of the 2017 HSE (Health, Safety and Environment) India Professional Development Conference and Exposition to be held in the city on February 16 and 17.

More than 200 HSE Professionals from around the world will gather at the conference to discuss and mutually learn on environmental, health and safety and sustainability issues relevant to the local context. This Conference is being organised by the American Society of Safety Engineers (ASSE) in collaboration with National Safety Council (NSC) of India.

The conference will have discussion on issues relevant to the local context like road safety and also the upcoming themes like sustainability and life cycle assessment. This will provide a great platform for local professionals to interact with professionals from 9 countries and 12 states of India. The conference would also have technical discussions on subjects like industrial hygiene and occupational health, risk management, process safety and business transformation.
Hyderabad, Feb 11 (UNI) The American Society of Safety Engineers (ASSE) in collaboration with National Safety Council (NSC) will conduct HSE (Health, Safety and Environment) India Professional Development Conference & Exposition in the city on February 16 and 17. Ministers of Transport of both Telugu speaking states, will be part of the global conference.

More than 200 HSE professionals from around the world will gather at the conference to discuss and mutually learn on environmental, health & safety and sustainability issues relevant to the local context. “We are proud to witness the growing interest for global events such as the Safety India 2017,” ASSE President Thomas Cecich, ASSE President said in a statement here today.

He said “It shows the commitment of HSE professionals across the globe to not only make workplaces safer but to create global spaces to share best practices, and learn from one another.”

The conference will have discussion on issues relevant to the local context like road safety and also the upcoming themes like sustainability and life-cycle assessment. This will provide a great platform for local professionals to interact with professionals from nine countries and 12 states of India. The Conference would also have technical discussions on subjects like industrial hygiene and occupational health, risk management, process safety and business transformation.

The conference would be accompanied by an exposition where exhibitors from software companies, international and national universities, budding entrepreneurs and safety equipment manufacturers from US, Canada, Australia and India would be exhibiting their products and services.

The two-day professional development conference would be preceded by one-day workshops on Sustainability on February 15 and two post conference workshops on Certified Safety Professional (CSP) Certification and Risk Assessment on February 18, the statement added.
Telangana, Andhra to partner with US experts on safety standards

In a move towards setting global standards in industrial safety, the American Society of Safety Engineers (ASSE) will engage the governments of Telangana and Andhra Pradesh in creating protocols across various sectors.

Ministers of transport of both the Telugu speaking states will be part of the 2017 HSE (Health, Safety and Environment) India Professional Development Conference and Exposition to be held here on February 16 and 17.

The conference would also have technical discussions on subjects like industrial hygiene and occupational health, risk management, process safety and business transformation.
Telangana, Andhra to partner with US experts on safety standards

In a move towards setting global standards in industrial safety, the American Society of Safety Engineers (ASSE) will engage the governments of Telangana and Andhra Pradesh in creating protocols across various sectors.

Ministers of transport of both the Telugu speaking states will be part of the 2017 HSE (Health, Safety and Environment) India Professional Development Conference and Exposition to be held here on February 16 and 17.

More than 200 HSE professionals from around the world will gather at the conference to discuss and mutually learn on environmental, health and safety and sustainability issues relevant to the local context.

This conference is being organised by ASSE in collaboration with National Safety Council (NSC) of India.

"We are proud to witness the growing interest for global events such as the Safety India 2017," said Thomas Cecich, ASSE President.

"It shows the commitment of HSE professionals across the globe to not only make workplaces safer but to create global spaces to share best practices, and learn from one another," he said.

The conference will have discussion on issues relevant to the local context like road safety and also the upcoming themes like sustainability and life cycle assessment. This will provide a platform for local professionals to interact with professionals from nine countries and 12 states of India.

The conference would also have technical discussions on subjects like industrial hygiene and occupational health, risk management, process safety and business transformation.
